

Where we Live

Where we Live is a curriculum integration pack containing 15 photocopiable mini-project sheets. There are also three blank poster-size backing sheets. The project sheets can be replicated as often as necessary to facilitate and encourage the involvement of as many children as possible. Each of the 15 mini-projects has its own area where it is mounted on backing sheet 1 or 2. Backing sheet 3 can be used creatively to expand on any of the mini-projects. Backing sheet 3 can also be used to write about a Science Experiment, a Maths Trail or an IT Exhibit.

All the information exhibited in the mini-projects can be presented in book format with the intention of creating a local resource to have in the school for posterity.
